

Detection of surface cracks in ferromagnetic materials

Magnetic particle crack detection

DEUTROPULS Hand yoke, portable equipment

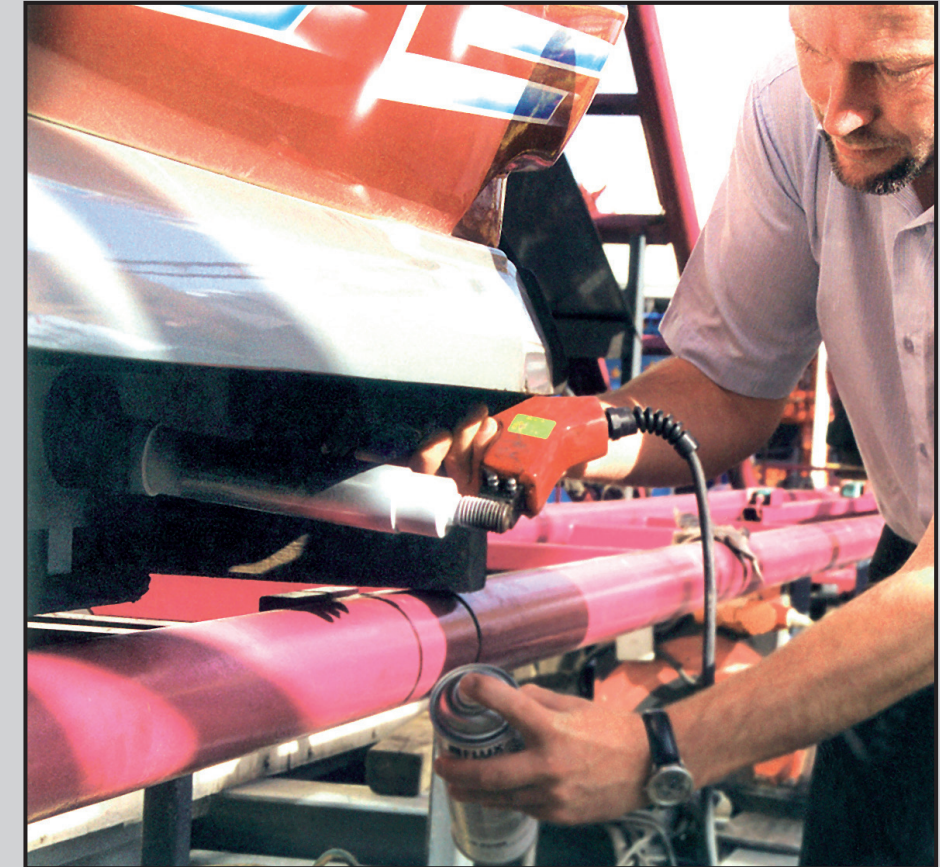

Countershaft for wind-mill generators

Testing of forged parts with flexible attachment poles

Galvanized welding seam

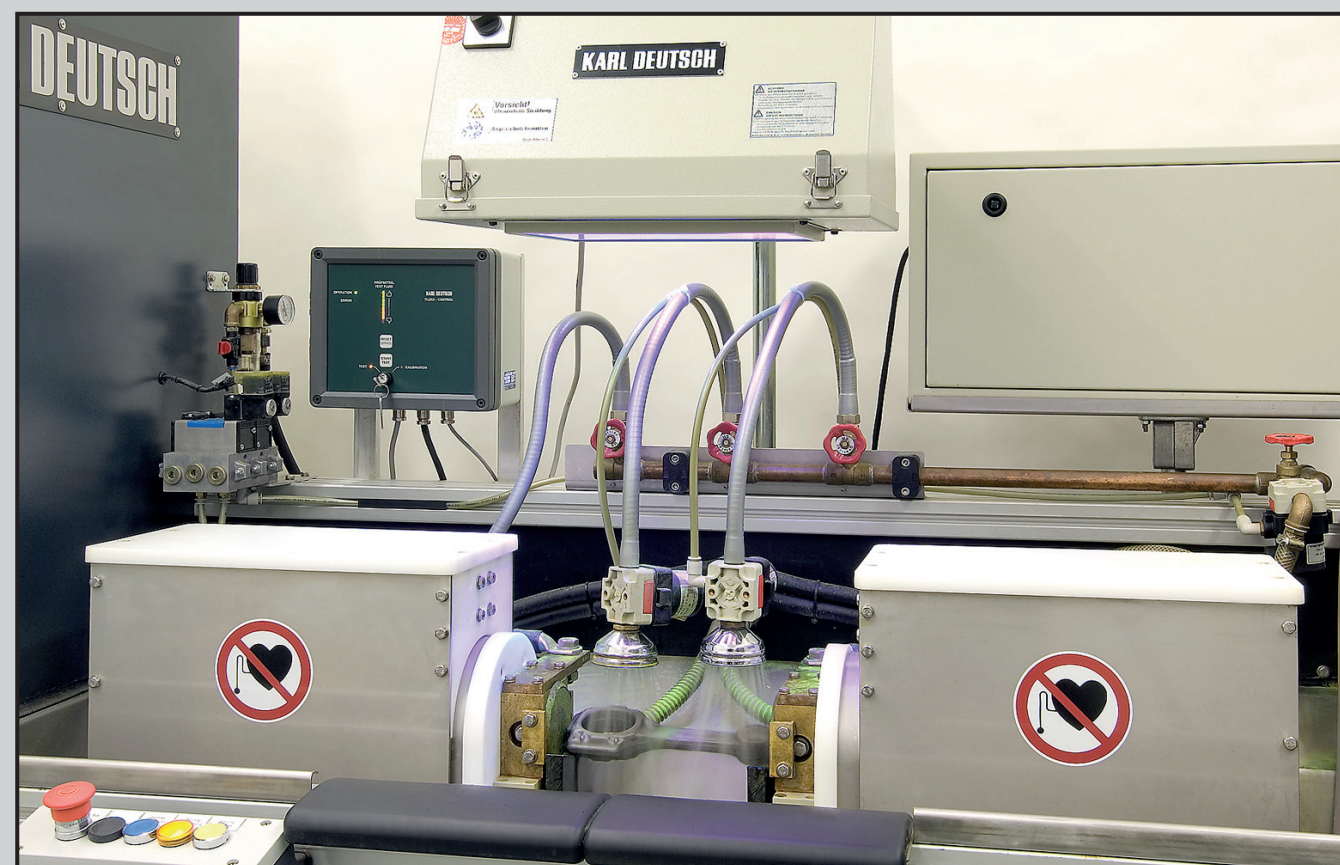

Axle of a rollercoaster

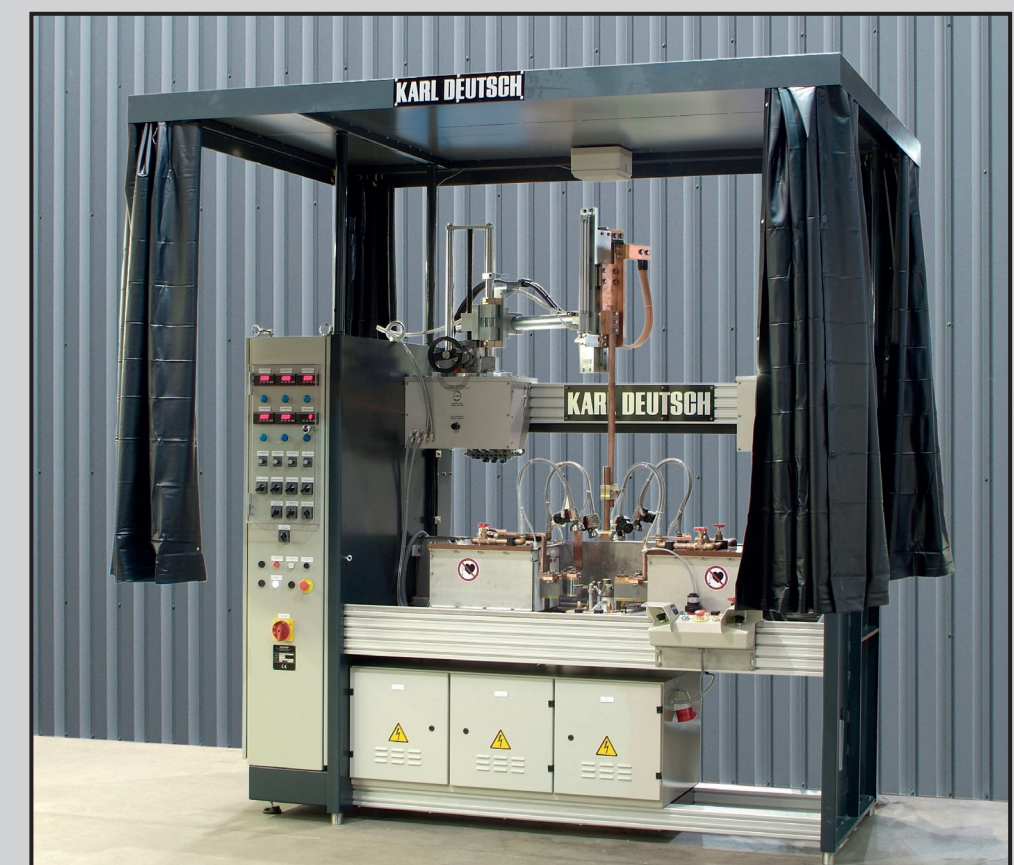

DEUTROFLUX Stationary systems

Crack evaluation under UV light

FLUXA-Control for automatic supervision of inspection fluid

Machine with darkening cabin

DEUTROMAT Special machines for special testing tasks

Testing of gear with cross yoke

Piston testing with chain conveyor
(4 parts per cycle)

Testing of steering knuckle
(6 contacts, ejector)
